GitHub Project Catalog

Muhammad Haroon | ImMohammadHaroon
Repository snapshot 30 September 2026

This catalog brings together all 40 repositories accessible through the connected GitHub account: 35 personal-account repositories and 5 shared or organization repositories. Each entry summarizes its purpose, features, technology stack and repository status, with links to the source and any recorded deployment.

All 40 repositories are public and unarchived. GitHub marks none as forks or templates. Learning collections, the profile repository, placeholders and incomplete scaffolds are identified separately. Shared repositories are listed under their actual owners.

The catalog reflects README descriptions, repository metadata and selected implementation files. Last-push dates are shown in Pakistan time. Deployment links are recorded project URLs; status descriptions do not certify operational readiness.

Catalog sections 27 personal projects | 8 learning and supporting repositories | 5 shared repositories

Personal projects

AGI-for-agriculture

Project | ImMohammadHaroon/AGI-for-agriculture

- **Purpose** Agricultural assistant combining leaf-image disease analysis with soil nutrient analysis and crop recommendations.
- **Features** LeafScan accepts leaf photos and produces AI-generated diagnosis, causes, and treatment suggestions. SoilCrop reads Arduino NPK sensors through Web Serial and generates crop and fertilizer advice tailored to Pakistan.
- **Tech stack** JavaScript, React 19, Vite, React Router, CSS, OpenAI API, Web Serial/Arduino.
- **Status** Documented application with a listed Vercel URL; API and sensor setup required. Last pushed 19 Sep 2026.
- **Recorded live link** agi-for-agriculture.vercel.app

Sources: README | Dependencies | PROJECT_DOCUMENTATION.md

agile-flow

Project | ImMohammadHaroon/agile-flow

- **Purpose** Full-stack task management and communication system for academic institutions.
- **Features** Role-based task assignment for HODs, professors, supporting staff, and students. Private/community messages, online status, task email notifications, and dashboard statistics.
- **Tech stack** JavaScript, React, Vite, Tailwind CSS, Express.js, Supabase/PostgreSQL, JWT, Nodemailer.
- **Status** README documents version 1.0.0 and local setup; a Vercel URL is listed. Last pushed 10 Sep 2026.
- **Recorded live link** agile-flow-mauve.vercel.app

Sources: README

basit-portfolio

Project | ImMohammadHaroon/basit-portfolio

- **Purpose** Professional portfolio for mobile app developer Basit Ali.
- **Features** Bio, skills, education, project gallery, and detailed project pages. Responsive layout, persistent dark/light theme, Framer Motion animation, and validated contact form.
- **Tech stack** JavaScript, React 18, Vite, Tailwind CSS, React Router, Framer Motion.
- **Status** Portfolio source and Vercel URL are present; README says contact delivery still needs a backend/email service. Last pushed 9 Jan 2026.
- **Recorded live link** basit-portfolio-indol.vercel.app

Sources: README | Dependencies

blog

Project | ImMohammadHaroon/blog

- **Purpose** Full-stack blogging website with authenticated post management.
- **Features** Sign-up/login/logout with token-protected post creation, editing, deletion, and retrieval. Image uploads and post comment creation, retrieval, and deletion routes.
- **Tech stack** JavaScript, React 17/Create React App, Material UI, Axios, Express.js, MongoDB/Mongoose, JWT, Multer/GridFS.
- **Status** Client and server implementations present. Last pushed 12 Jun 2024.

Sources: README in client | server/package.json | server/routes/route.js

budget-tracker

Project | ImMohammadHaroon/budget-tracker

- **Purpose** BudgetFlow personal finance web app for tracking income, spending, and savings.
- **Features** Monthly balance dashboard with recent transactions and income/expense totals. Add, search, filter, and delete transactions; charts for savings, monthly income versus expenses, and cash flow. Email/password authentication using Supabase.
- **Tech stack** JavaScript, React 18, Vite, Tailwind CSS, Supabase/PostgreSQL, Framer Motion, Recharts.
- **Status** Documented application with a listed Vercel URL; Supabase configuration is required. Last pushed 10 Sep 2026.
- **Recorded live link** budget-tracker-mocha-seven.vercel.app

Sources: README | Dependencies

d247-cricket

Project | ImMohammadHaroon/d247-cricket

- **Purpose** Static cricket and sports dashboard interface styled around a D247-style sports/odds layout.
- **Features** Sports category tabs, expandable navigation, and cricket fixture/odds-style rows. Account balance display and sports/casino navigation are represented in static page content.
- **Tech stack** HTML, CSS, JavaScript, Bootstrap, jQuery, Font Awesome.
- **Status** Static frontend with a listed GitHub Pages URL; fixtures shown in source are hard-coded. Last pushed 18 May 2024.
- **Recorded live link** immohammadharoon.github.io/d247-cricket

Sources: README | index.html

Devowl-FB-BOT

Project | ImMohammadHaroon/Devowl-FB-BOT

- **Purpose** Desktop application for automating Facebook Marketplace product listings.
- **Features** Listing management, posting status statistics, logs, and start/pause/resume/stop controls. Repository metadata describes license-key activation and machine locking; Electron packaging targets Windows.
- **Tech stack** JavaScript, Electron, React, Vite, Puppeteer, CSV parsing.
- **Status** Application source present, but package.json contains unresolved merge-conflict markers that need repair before normal installation/build. Last pushed 18 Mar 2026.

Sources: README | Dependencies | renderer/App.jsx

devowll

Project | ImMohammadHaroon/devowll

- **Purpose** Ghulabdev website presenting remote internship programs and digital services.
- **Features** Program/service pages for web development, e-commerce, UI/UX design, and digital marketing, plus application and contact routes. Certificate verification interface currently checks mock certificate records.
- **Tech stack** JavaScript, React 19, Vite, Tailwind CSS, React Router, Framer Motion; EmailJS, Convex, and Resend dependencies.
- **Status** Website source and Vercel URL are present; certificate verification uses mock data and has a backend TODO. Last pushed 10 Sep 2026.
- **Recorded live link** devowll-omega.vercel.app

Sources: README | src/pages/Home.jsx | src/pages/VerifyCertificate.jsx

dr-iftikhar-portfolio

Project | ImMohammadHaroon/dr-iftikhar-portfolio

- **Purpose** Academic and research portfolio for Dr. Hafiz Iftikhar Hussain, a veterinary pathologist and molecular researcher.
- **Features** Research publications, background, professional timeline, conferences, and academic statistics. Responsive presentation, animated sections, search metadata, and an EmailJS contact form.
- **Tech stack** JavaScript, React 19, Vite, Tailwind CSS, Framer Motion, EmailJS.
- **Status** Documented academic portfolio with a recorded Vercel homepage. Last pushed 10 Sep 2026.
- **Recorded live link** dr-iftikhar-portfolio.vercel.app

Sources: README | Dependencies

Foodly.

Project | ImMohammadHaroon/Foodly.

- **Purpose** Restaurant-facing frontend for a homemade-food delivery platform in Pakistan.
- **Features** Home, About, Contact and How It Works pages explain restaurant onboarding and ordering. Login and signup interfaces; the inspected login uses a simulated submission. Reusable responsive page components and page metadata.
- **Tech stack** JavaScript, React 18, Vite, React Router, Tailwind CSS.
- **Status** Frontend demo; the inspected login is simulated. Last pushed 29 May 2025.
- **Recorded live link** foodly-wheat.vercel.app

Sources: README | src/pages/Home.jsx | src/pages/Login.jsx

humanize-ai

Project | ImMohammadHaroon/humanize-ai

- **Purpose** Web app for analyzing text for AI-like patterns and rewriting it in a selected tone.
- **Features** Detection view shows overall and sentence-level scores. Humanizer provides professional, casual, academic and creative tones with intensity controls and streamed output. Authenticated dashboard and saved analysis history use Supabase.
- **Tech stack** TypeScript, React, Vite, shadcn/ui, Tailwind CSS, Supabase, TanStack Query.
- **Status** Application implementation with a recorded Vercel deployment URL. Last pushed 11 Feb 2026.
- **Recorded live link** humanize-ai-pi.vercel.app

Sources: README | src/pages/Humanize.tsx | src/pages/Detect.tsx

InvoiceFlow

Project | ImMohammadHaroon/InvoiceFlow

- **Purpose** Full-stack demonstration of a construction accounts-payable invoice review workflow.
- **Features** Invoice dashboard with status filters, summary cards and possible-duplicate indicators. Detail pages show line items and support review notes plus approve/reject confirmation. Next.js API routes validate requests and persist review changes in Supabase PostgreSQL.
- **Tech stack** TypeScript, Next.js App Router, React, Tailwind CSS, Zod, Supabase PostgreSQL.
- **Status** Demonstration workflow with seed data and setup instructions; authentication, OCR and uploads are outside its documented scope. Last pushed 30 Sep 2026.

Sources: README | Dependencies

kind-red-of-Ireland

Project | ImMohammadHaroon/kind-red-of-Ireland

- **Purpose** Next.js recreation of the Kindred of Ireland linen-clothing storefront.
- **Features** Homepage assembles product, craftsmanship, menswear, bridal, news and Instagram sections. Includes product, collection, search, cart and checkout routes. Uses generated content extracted from a static site mirror and a chat-widget component.
- **Tech stack** Next.js, React, JavaScript/TypeScript, CSS and Tailwind CSS tooling.
- **Status** Storefront recreation with cart and checkout routes; a deployment URL is recorded. Last pushed 10 Sep 2026.
- **Recorded live link** kind-red-of-ireland.vercel.app

Sources: README | src/data/generated/content.json | src/app

MedMatch-ai

Project | ImMohammadHaroon/MedMatch-ai

- **Purpose** Educational heart-disease risk assessment demo combining a machine-learning classifier with rule-based recommendations.
- **Features** React patient-input form calls a FastAPI prediction endpoint. Random Forest pipeline returns a risk probability and result view. Rule-based output includes urgency, doctor guidance and lifestyle tips linked to submitted values.
- **Tech stack** React, Vite, Tailwind CSS, Axios; Python, FastAPI, Pandas, scikit-learn, joblib.
- **Status** Explicitly an educational/demo project, not a medical device; local setup is documented. Last pushed 10 Sep 2026.

Sources: README

meet-ai

Project | ImMohammadHaroon/meet-ai

- **Purpose** Early Next.js dashboard scaffold for authenticated users and configurable AI-agent records.
- **Features** Better Auth setup supports authentication with GitHub/Google configuration. PostgreSQL schema stores named agents and instruction text. tRPC provides an agent-list query alongside dashboard and authentication modules.
- **Tech stack** TypeScript, Next.js 15, React 19, Tailwind CSS, Better Auth, tRPC, Drizzle ORM, Neon/PostgreSQL.
- **Status** Early scaffold: inspected home view is a placeholder; repository lists a Vercel URL. Last pushed 20 Oct 2025.
- **Recorded live link** meet-ai-green.vercel.app

Sources: README | src/modules/agents/server/procedures.ts | src/modules/home/ui/view/home-view.tsx

meeting-ai

Project | ImMohammadHaroon/meeting-ai

- **Purpose** Full-stack platform for live meetings, transcripts, generated notes and follow-up tasks.
- **Features** Supports real-time meetings with WebRTC and Socket.io plus an included recording-extension folder. Generates English transcripts, meeting notes, action items and transcript-based Q&A. Organization management and data storage use Supabase authentication and PostgreSQL.
- **Tech stack** React, Vite, Tailwind CSS; Node.js, Express, Supabase/PostgreSQL, Socket.io, WebRTC; OpenAI Whisper and GPT-4o mini.
- **Status** Documented meeting application with a recorded live demo URL. Last pushed 10 Sep 2026.
- **Recorded live link** meetingai.dev

Sources: README | backend/package.json | backend/src/services/aiService.js

Music-player

Project | ImMohammadHaroon/Music-player

- **Purpose** Browser music player for locally selected audio files.
- **Features** Loads multiple audio files into a selectable playlist. Provides play/pause, previous/next track and automatic progression. Includes progress seeking, elapsed/duration labels and an animated vinyl-disc interface.
- **Tech stack** HTML, CSS, vanilla JavaScript and the browser Audio API.
- **Status** Static application implementation with a recorded deployment URL. Last pushed 24 Aug 2025.
- **Recorded live link** music-player-azure-tau.vercel.app

Sources: index.html | script.js

number-plate-recognation---extraction

Project | ImMohammadHaroon/number-plate-recognation---extraction

- **Purpose** Computer vision notebook for locating a vehicle number plate and extracting its text from an image.
- **Features** Uses grayscale conversion, noise reduction, edge detection and contours to isolate the plate. Reads plate text with EasyOCR and draws annotated results; includes a Word report.
- **Tech stack** Python, Jupyter Notebook, OpenCV, EasyOCR, NumPy, Matplotlib, imutils.
- **Status** Notebook prototype with a local image input. Last pushed 13 Jun 2025.

Sources: README | plate.ipynb

portfolio

Project | ImMohammadHaroon/portfolio

- **Purpose** Mohammad Haroon's full-stack developer portfolio.
- **Features** Presents selected work, background, technology stack, publications and contact sections. Includes structured metadata, sitemap and robots routes, plus scroll-reveal components.
- **Tech stack** Next.js, React, TypeScript, CSS, Nodemailer.
- **Status** Portfolio implementation with a configured public homepage. Last pushed 25 Sep 2026.
- **Recorded live link** www.haroon.live

Sources: app/page.tsx | Dependencies

portfolioo

Project | ImMohammadHaroon/portfolioo

- **Purpose** Static DevOwl portfolio presenting professional background, services and work.
- **Features** Includes About, project filters, services, blog cards, CV download and contact sections. Uses animated reveals and a carousel library in a responsive page.
- **Tech stack** HTML, CSS, JavaScript, Swiper, MixItUp, ScrollReveal.
- **Status** Earlier static portfolio implementation; configured homepage uses the /portfolio/ path. Last pushed 18 Dec 2024.
- **Recorded live link** immohammadharoon.github.io/portfolio

Sources: README | index.html

Portfollio

Project | ImMohammadHaroon/Portfollio

- **Purpose** React portfolio showcasing full-stack development and AI projects.
- **Features** Project case studies, category filters, contact form, and dark/light themes. Lazy-loaded routes, motion effects, per-page SEO and Vercel analytics.
- **Tech stack** React, Vite, Tailwind CSS, React Router, Framer Motion, Web3Forms.
- **Status** README documents Vercel deployment at devowl.me. Last pushed 19 Sep 2026.
- **Recorded live link** devowl.me

Sources: README | Dependencies

qr-genie

Project | ImMohammadHaroon/qr-genie

- **Purpose** Web application for generating QR codes.
- **Features** Provides a React QR generator interface with reusable tabs and UI components. Includes optional Supabase integration and database migrations.
- **Tech stack** React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Supabase.
- **Status** Application source and setup instructions present; configured Vercel homepage. Last pushed 5 May 2026.
- **Recorded live link** devowl-qr.vercel.app

Sources: README | Dependencies

react-dashboard

Project | ImMohammadHaroon/react-dashboard

- **Purpose** Administration dashboard interface for sales and business metrics.
- **Features** Displays sales, revenue and expense charts with example data. Includes navigation for orders, customers, products and analytics, plus update cards.
- **Tech stack** React, Create React App, Material UI, ApexCharts, Framer Motion.
- **Status** Frontend dashboard demo using hard-coded sample data. Last pushed 28 Aug 2024.

Sources: src/App.js | src/Data/Data.js | Dependencies

speak-translate

Project | ImMohammadHaroon/speak-translate

- **Purpose** Devowl Transcriptor converts uploaded audio into a transcript and English translation.
- **Features** Audio upload, transcription and translation through Supabase Edge Functions and an AI gateway. Email OTP authentication and per-user history stored in Postgres.
- **Tech stack** React, TypeScript, Vite, Tailwind CSS, shadcn/ui, Supabase/Postgres, Lovable AI Gateway, Resend.
- **Status** README documents the application workflow; configured Vercel homepage. Last pushed 10 Sep 2026.
- **Recorded live link** speak-translate.vercel.app

Sources: README | Dependencies

sphere

Project | ImMohammadHaroon/sphere

- **Purpose** ProjectSphere is a multi-tenant project management application for organizations and clients.
- **Features** Custom Kanban boards, tasks, milestones, comments, attachments and role-based dashboards. Reporting, notifications, client portal and subscription billing configuration.
- **Tech stack** React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Socket.io, JWT, Stripe.
- **Status** README documents Vercel deployment; Socket.io is disabled there by default, with HTTP refetch as fallback. Last pushed 25 Sep 2026.
- **Recorded live link** ml-sphere.vercel.app

Sources: README

to-do-app

Project | ImMohammadHaroon/to-do-app

- **Purpose** Task manager with individual user accounts and cloud storage.
- **Features** Email/password sign-in through Firebase Authentication. Users can add, view and delete their own tasks in Firestore.
- **Tech stack** React, Vite, Firebase Authentication, Firestore, React Router, Tailwind CSS.
- **Status** Application source and setup instructions present; configured Vercel homepage. Last pushed 6 Jul 2025.
- **Recorded live link** to-do-app-beryl-nu.vercel.app

Sources: README | Dependencies

unbound

Project | ImMohammadHaroon/unbound

- **Purpose** Marketing website for UnBound X, a social investing and smart-finance product.
- **Features** Sections for users, creators, tools, security, team, careers and contact. Animated sticky sections, scroll effects and a Join Now interface.
- **Tech stack** Next.js, React, TypeScript, Tailwind CSS, GSAP, Swiper.
- **Status** Frontend marketing site; repository content does not establish a working investment platform. Last pushed 10 Sep 2026.
- **Recorded live link** unbound-amber-five.vercel.app

Sources: app/layout.tsx | app/page.tsx | Dependencies

Learning collections and supporting repositories

Collections, profile content and incomplete starters are retained here so the inventory includes every repository.

Data-scinece

Learning collection | ImMohammadHaroon/Data-scinece

- **Purpose** Personal data science coursework and learning collection.
- **Contents** Jupyter notebooks, assignment folders, and midterm material. README describes study topics including data cleaning, EDA, visualization, feature engineering, and machine learning.
- **Tech stack** Python/Jupyter Notebook; README lists NumPy, pandas, Matplotlib, Seaborn, Plotly, and scikit-learn.
- **Status** Coursework collection. Last pushed 20 Nov 2025.

Sources: README

html-javascript-project

Learning collection | ImMohammadHaroon/html-javascript-project

- **Purpose** Mixed collection of small web exercises and utilities.
- **Contents** Includes portfolio-website, navbar and skills folders. Contains a PDFMerge utility documented to combine PDFs into a buffer, stream or saved file. Also includes a SQL exercise and a RenameX starter folder.
- **Tech stack** HTML, CSS, JavaScript; Node.js and PDFtk for the included PDF utility; SQL.
- **Status** Learning collection with minimal root documentation; RenameX contains an empty index.js. Last pushed 3 Apr 2024.

Sources: README | RenameX | pdf-merge-master/pdf-merge-master

ImMohammadHaroon

Profile repository | ImMohammadHaroon/ImMohammadHaroon

- **Purpose** GitHub profile repository presenting Muhammad Haroon's developer background and work.
- **Contents** Profile README introduces full-stack development interests and current work. Links to a portfolio and resume and includes visual profile badges.
- **Tech stack** Markdown and embedded HTML with hosted images/badges.
- **Status** Profile content repository rather than a standalone software project. Last pushed 10 Sep 2026.

Sources: README

javascript-projects

Learning collection | ImMohammadHaroon/javascript-projects

- **Purpose** Collection of JavaScript mini-projects for practicing browser programming.
- **Contents** Utilities include a calculator, countdown, form validator, quote generator and book keeper. Interaction examples cover drag-and-drop, infinite scrolling, themes and picture-in-picture. Game and media examples include Pong, a math sprint game, paint clone and video player.
- **Tech stack** JavaScript with HTML/CSS browser interfaces.
- **Status** Educational collection with README descriptions and screenshots. Last pushed 27 Mar 2024.

Sources: README

learning-react

Learning collection | ImMohammadHaroon/learning-react

- **Purpose** React learning repository containing topic exercises and small application versions.
- **Contents** Covers fragments, forms, useRef, Context API/useReducer, Redux and routing. Projects include calculators, Pakistan clocks, a social-media example and several to-do app versions. Includes Bootstrap exercises and advanced React material.
- **Tech stack** JavaScript, React, Bootstrap; Context API, Redux and React Router exercises.
- **Status** Educational source collection with a brief README. Last pushed 9 May 2024.

Sources: README | Dependencies | projects

NLP_Learn

Learning collection | ImMohammadHaroon/NLP_Learn

- **Purpose** Introductory natural-language-processing exercises focused on tokenization.
- **Contents** Demonstrates sentence and word tokenization using NLTK. Contains explanatory comments about tokenization, corpus and corpora.
- **Tech stack** Python and NLTK.
- **Status** Small learning repository containing one tokenization lesson. Last pushed 19 Mar 2025.

Sources: README | tokenization/1st_lecture.py

NPK-SOIL-SENSOR

README only placeholder | ImMohammadHaroon/NPK-SOIL-SENSOR

- **Purpose** Placeholder repository named for an NPK soil-sensor project; implementation details are not supplied.
- **Contents** Contains only a README heading naming the project.
- **Tech stack** Not specified; no implementation files found.
- **Status** README-only placeholder; root contents confirm no source implementation. Last pushed 20 May 2026.

Sources: README

redux-shopping-page

Incomplete scaffold | ImMohammadHaroon/redux-shopping-page

- **Purpose** React and Redux shopping-page scaffold.
- **Contents** Dependency manifest includes Redux Toolkit, React Redux and React Router. Default branch contains the manifest, lockfile and starter README.
- **Tech stack** Declared dependencies: React, Redux Toolkit, React Redux, React Router, Create React App.
- **Status** Incomplete scaffold; no application source directory in the default branch. Last pushed 23 Aug 2024.

Sources: README | Dependencies

Shared and organization repositories

These repositories are accessible through collaboration or organization membership. Their listed owners differ from the connected personal account.

Anabiya-Shahid-Rental-Properties-Business

Project | anabiyashahid/Anabiya-Shahid-Rental-Properties-Business

- **Purpose** University semester portfolio showcasing property rental and real estate web concepts for Anabiya Shahid.
- **Features** Property cards present rental homes, buy/sell listings, apartment pricing, and commercial spaces. Includes inquiry, contact, student-registration, and teacher-registration pages, with PHP processing files.
- **Tech stack** HTML, CSS, JavaScript; PHP form handlers.
- **Status** University coursework portfolio with frontend pages and PHP form handlers. Last pushed 23 Jan 2026.

Sources: index.html

dashboard

Project | foodlly/dashboard

- **Purpose** Foodlly restaurant onboarding and business-registration frontend.
- **Features** Login, sign-up, phone/OTP verification, and business setup screens. Multistep onboarding covers location, legal documents, banking, partnership, menu, and confirmation.
- **Tech stack** JavaScript, React 19, React Router, Vite, Tailwind CSS.
- **Status** Onboarding source is present; dashboard, menu, and admin routes are explicitly disabled in App.jsx. Last pushed 31 Jan 2026.

Sources: README | Dependencies | src/App.jsx

Mobile-User-App

Empty repository | foodlly/Mobile-User-App

- **Purpose** Reserved repository named Mobile-User-App under the Foodlly organization.
- **Contents** No files or README are available to establish functionality.
- **Tech stack** Not specified; empty repository.
- **Status** Empty repository confirmed by GitHub contents API. Last pushed 30 Jan 2026.

Sources: GitHub repository

BlueLine

Project | Umair-Siddique/BlueLine

- **Purpose** Authenticated chat frontend in a shared repository.
- **Features** Sign-up/sign-in screens with protected and public routes. Creates, selects and deletes conversations; stores recent chat history in localStorage.
- **Tech stack** React, JavaScript, Vite, React Router, Tailwind CSS, Axios, React Markdown.
- **Status** Shared frontend implementation with a configured Vercel homepage. Last pushed 16 Sep 2025.
- **Recorded live link** blue-line-red.vercel.app

Sources: src/App.jsx | src/pages/ChatPage.jsx | Dependencies

Mag-Rag

Project | Umair-Siddique/Mag-Rag

- **Purpose** Retrieval-augmented chat backend for a brand-strategy assistant.
- **Features** Uses vector retrieval, optional web search and conversation history to generate responses. Provides authentication, conversation management, document upload and custom system-prompt endpoints.
- **Tech stack** Python, Flask, Supabase, Pinecone, OpenAI, LangChain, LangGraph, Tavily; document-processing libraries.
- **Status** Shared backend implementation with Render configuration. Last pushed 7 Sep 2025.
